## quiz in a module

Posted by robio - 2012/07/24 11:31

---

is there any way to show the quiz within module(custom html)?

Hello,

It is possible to embed a quiz into a component content with help of "ARI Quiz Lite in Content" plugin, but it is not possible to use in custom module. We can extend "ARI Quiz in Content" plugin for "ARI Quiz" extension so it loads a quiz into any content including custom modules.

Regards,  
ARI Soft
