
About \"skip\" button

Posted by sumanguj - 2010/03/25 07:08

how should i make the skip button work in such a way that when a user takes the quiz completely, they are not ask the skipped question again? i m searching for a solution but couldn't find it. please help.

note: i have decided to give it a try even though negative marking would have been great :)

Hello,

Do you want to disable button for the last question?

No,
i want the quiz to get over with once the user completes the quiz instead of asking the user to try again those questions where were "skipped" earlier.

you are really fast. m impressed with the support here.

regards,
suman

"Skip" buttons is only used for getting an user possibility to move to the next questions and return back to current question later.

exactly. i don't want the user to return to those skip questions.

how can i do this?

Current version of the component doesn't provide this ability, it requires improvement of the component.
