Hello,

"ARI Quiz Lite" uses universal installer and the same version can be installed on Joomla! 1.5, 1.6, 1.7, 2.5 and 3.0.

Documentation can be found on "Components -> ARI Quiz Lite -> Help" page on Joomla! backend.

Documentation can be found on "Components -> ARI Quiz Lite -> Help" page on Joomla! backend.

das ist schon, hier wird nur nicht beschrieben wie ich ein Quiz in einem Beitrag aufrufe.

--- Englisch - Google ---

which is nice here is not only described as I run a quiz in a post.

Populate a quiz with questions (click by "Questions -> View" link on "Components -> ARI Quiz -> Quizzes" page to open quiz questions page), create a link to quizzes page in Joomla! menu manager and then use created link on frontend part of your site to open quizzes page.
