## ari quize manual ?

Posted by balulilu - 2010/04/24 13:57

---

sorry, did not found any other thread more suitable for this post :(

is there any manual ? how to set up quiz after installation ?  
I don't want manual for installation or how to show link in menu

i want manual for creating quiz! is there any step by step manual ?

thank you in advance

Hello,

Do the following steps for creating a quiz:

1. Open 'Quizzes' page on the component backend.
2. Click 'Add' button and set quiz settings.
3. Click 'Save' button.
4. Click 'View' link in 'Questions' column in quizzes data grid on 'Quizzes' page.
5. Click 'Add' button for adding questions.

That's all :)

thank you very much :) No I will try to do that :) I hope I will make it work.

is there a feature in ari quiz lite for question scoring ? I mean to score question by difficulties ? when you have test with 60 questions its obvious that some are easy and some are difficult so there should be some difference.  
is there a option for that ?

You can set necessary score for each question when create or edit it. Or you mean something another?

Hi, I have the same issue with setting up ARI quiz lite and finding a manual. I followed your steps in response to the post on how to set up and was unable to get anywhere after step 5.

- What do you do after you have set up the questions?
- Where do you go to set the quiz up on the front end, as in part of the menu etc?

It would be very beneficial if there was a manual and some more instruction to get this working.

Stewart

Hello,

Tutorial is available on "Help" page on component backend.

Create a menu item in Joomla! menu manager for "ARI Quiz Lite" extension (select "Components -> ARI Quiz Lite -> Quiz list layout" menu item type).

Ok that's great. Thank you for the prompt response. I will need to spend some time to learn how to configure this. What does the pay version of the quiz enable/offer?

some of the functions in the table i dont understand. I want to set up a information reading component at the start of each quiz in which the questions will be based on what the information relates too.

---

Do you want to show a description before each quiz?

---

I want to place information before the quiz so users can 'train' on a certain topic before they are quized

---

I want to put information, like about 200 words of content that I want to quiz people on.

Users will read the information and proceed to the quiz

---

The extension show a quiz description on a quiz page. Quiz description can be entered in quiz settings. See "Description" field. You can put your information in quiz description.
