Create list of answers with select/option

Posted by VictorT - 2013/06/13 15:06

_____

Hello

first, sorry for my english (i'm not english).

I want to create a quiz with Ari Quiz Lite.
I create "single question" but it generate a list of button.
I don't find how to change this 'bouton list' into a 'select list (with)'.

If you have a solution/plugin/hack to do this i will be very happy :)

Have a nice day

Victor

_____

Hello,

"ARI Quiz" supports this ability by default (it is possible to select how answers will be shown as radio buttons list or as drop-down). "ARI Quiz Lite" doesn't support this feature.

Regards,
ARI Soft
