
Variables with useful information

Posted by brugal - 2013/07/26 05:53

Is there a variable that stores which question they are responding right now? And for questions they have been answered, there is some variable that check whether their answers were correct?

What variables do you mean? In a PHP file?

i don't know...in the same way that it's possible to find (and use) these parameters in base template:

```
{ $UserName }  
{ $SpentTime }  
{ $StartDate }  
{ $QuizName }  
{ $MaxScore }  
{ $UserScore }  
{ $PercentScore }  
{ $PassedScore }  
{ $Passed }  
{ $EndDate }
```

it will be possible to find the parameters i'd commented in previous post?

The extension doesn't provide the described variables for text templates.
