
wrong time zone

Posted by deserteagle - 2013/08/15 09:00

The quiz result date (start date, end date) is in UTC+0, which is not correct, I set utc+8 (shanghai) in joomla 1.7 global configuration, and the datetime store in mysql is utc+0.

I found an article about the date in joomla, but now idea how to modify it.

<http://webamoeba.co.uk/blog/working-with-dates-in-joomla/>

can anyone help?

I use lite version.

I saw there are some code in class.Date.php to handle timezone, no idea why it can't work.

```
function formatDate($date, $format = null, $tz = null)
{
    $format = ArisDate::_getFormat($format);
    $tz = ArisDate::_getTimeZone($tz);

    $regs = null;
    if ($date && preg_match('#({4})-({2})-({2})\s({2}):({2}):({2})#', $date, $regs))
    {
        $date = mktime($regs, $regs, $regs, $regs, $regs, $regs);
        $date = $date > -1 ? strftime($format, $date + ($tz * 60 * 60)) : '-';
    }

    return $date;
}
```

Provide the following information:

1. What version of the extension do you use?
2. Does the problem occur on frontend or backend? Does it occur on the page will all quizzes results?
3. What time zone is used for user who opens the page?

Regards,
ARI Soft

Re:wrong time zone

1. com_ariquizlite 1.5.0
 2. both, same for all result, it look like the timezone calculation no effect.
 3. UTC+8, same as server time.

1. The latest version of the extension is 1.2.3 so you can't use version 1.5.0.

Regards,
ARI Soft

Re:wrong time zone

Posted by deserteagle - 2013/08/21 01:00

yes, the version is 1.2.3, sorry for the mistake.

I just hacked the wamp\www\administrator\components\com_ariquizlite\kernel\Date\class.Date.php

line 75:

from
\$tz = \$timezone;

to
\$tz = 8;

now the start date and end date in the quiz result in backend are UTC+8, but still UTC+0 in front end.

Hello, I have a problem with my time zone <http://www.ari-soft.com/images/fbfiles/images/ari-791666d7fb430d22e84424220ae12aa0.jpg>

ari quiz 3.6.6

Hello,

The extension doesn't use time zone from your local computer. It uses time zone from Joomla! settings or time zone of currently logged user. You read about it here.

Could you send a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate it?

Regards,
ARI Soft

Thank you, no problem.
How did you solve the problem?

=====

Re:wrong time zone

Posted by admin - 2014/04/19 08:15

We updated \administrator\components\com_ariquiz\models\userquiz.php file.

Regards,
ARI Soft
