
more than one language in the frontend

Posted by nerdine - 2013/12/29 19:32

hey,

i have a website which is supported in english and in german and i use the ari quiz lite in this site. but how can i manage that for ari quiz more than one language is supported in the frontend?(because i only can set one language as default language in the backend) thanks so far. greeting nerdine :cheer:

Hello,

"ARI Quiz Lite" supports only one active translation.

"ARI Quiz" loads translation based on current Joomla! language (translation includes labels, button names and etc., questions and answers are not translated).

Regards,
ARI Soft
