
zero (0) as an answer to a free text question

Posted by manspan - 2014/04/15 11:10

I have created a free text question. I set the correct answer to 0 (zero). When I run the quiz with the specific question, i give 0 as the answer but it is wrong.
Any ideas?

Hello,

Could you send screenshot of question settings page by email?

Regards,
ARI Soft
