This bug in Joomla! 3.4.0 which will be fixed in v. 3.4.1. You can read about it [here](#).

The link contains a patch or you can install the extension from directory. For this unpack the extension and use "Install from directory" option on installation page.

I am sorry, but I can start with this patch, unfortunately, nothing. Probably it is the best to wait up to the actualisation on joomla 3.4.1?

thanks, nevertheless, for the information. TS

Unzip the extension and install it from a directory. It works without a patch.

"ARI Quiz Lite" doesn't contain a German translation, but it is possible to create own translation.

BTW, "ARI Quiz" contains a German translation for frontend part.
