
How to added Params list at text tempate

Posted by ictizam - 2015/06/25 03:07

Hi,

How to added the Param list at text template as below?

Params :

```
{ $UserName }
{ $SpentTime }
{ $StartDate }
{ $QuizName }
{ $MaxScore }
{ $UserScore }
{ $PercentScore }
{ $PassedScore }
{ $Passed }
{ $EndDate }
```

i want to added information in user profile to display after get the result. <http://www.ari-soft.com/images/fbfiles/images/Capture1-1155c5cdc334199f43df811447fb1189.JPG>

Hello,

The extension can show a text template at the end of a quiz. For this select a text template in quiz settings in "Successful template" and/or "Failed template" drop-downs.

Regards,
ARI Soft

so can't able to added into this list?

for example, age and id number. this 2 item able to get into database same like username.

logically able to added this value and drag into row we need. TQ.

You can modify the extension for your needs and add new variables. For this see #__arigenerictemplateparam table into database and "getFinishedResult" method in /administrator/components/com_ariquizlite/kernel/Controllers/class.ResultController.php file.

Regards,
ARI Soft

Hi,

Already added but no changes into that pages (Text Template).

Please advised.. TQ..

Sorry, but modification of the extension is not a part of free support. We specified in our previous post how to implement this feature.

We can add new variables to text templates for "ARI Quiz" extension.

Regards,
ARI Soft
