
ARI QUIZ LITE problem with \"Continue\" button

Posted by katyuna - 2015/11/25 10:14

Hi!

I try to use Ari Quiz Lite 1.2.7, Joomla 3.4.5.

I created menu item - Ari Quiz Lite - Quiz Layout - My Test

On click is open my test with description and "Continue" button (press to go to the test).

When I click on "Continue" button it is 1052 mistake:

You can not visit this page because of:

- date bookmark / favorite

- a search engine that has an overdue list for the site

- a mistyped address

- you do not have access rights to this page

- The requested resource is not found.

- Processing your request has failed.

Please go to one of the following pages:

- Homepage

If problems continue, please contact the system administrator of the site and report the error, which will be described below.

All test are active.

Also I can't assign category or templates for My Test. It is 1054 mistake (without description).

Regards

=====

Hello,

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

The problem occurs because a non-legal copy of "ARI Quiz" was installed on your site.
