Languages Frontend doesn\'t translate everything?
Posted by Amalia - 2016/02/12 14:59

_____

I added a new frontend language. I translated every single label. And I made it my default language.

It works.... except at the result page. :dry: Only some words are translatet there.

Is that a bug? Have I missed anything?

I have attached a screenshot (hope it works).

http://www.ari-soft.com/images/fbfiles/images/result-42258201cc0587e5863378c0a1fbcce4.jpg

I use Joomla 3.4.8 and ARI Quiz lite 1.2.7.

_____

Hello,

Find an appropriate template on "ARI Quiz Lite -> Text templates" page on component backend.

Regards,
ARI Soft
