
Cache ???

Posted by asknames - 2016/04/17 14:48

Hi eveybody;

I install Ari Quiz Lite on a Joomla site, where the cache is not enabled. The goal was to try it for one of my client, I try several type of quizz, but it look like that there maybe some cache that prevent me to see the changes when I added a new question. Am I mistaken?

I try to clear the joomla cache just in case, but any new question does not show... Can somebody help?

Thank you!

Hello,

Complete current quiz session and start a new one.

Regards,
ARI Soft
