
Ari quiz default not working - ERROR

Posted by acausade - 2016/09/30 09:17

Hi

I click on front end lanaguages, edit the labels - ok.

But when i slect defaulty lanaguage with radio button and then green button 'Default' I get the following error:

An error has occurred.

0 Using \$this when not in object context

So I can not change the labels of the buttons - there is also no language file in the front end language folder for ariquiz?

Any ideas how I can either fix the error so I can choose default language in admin panel or directly in files?

Thanks!

Andy

Hello,

Download the extension again and update it.

Regards,
ARI Soft

Hi, perfect! Thanks very much.

I've changed the table based question templates to div responsive based to make the default look a bit better:

<http://www.pshesouthwest.com/development/pshe-quizzes/quiz-1.html>

Let me know if you'd like me to send the files over

Thanks again
