
Cannot save Questions!

Posted by JVKTh - 2016/10/18 23:30

Hello, ARI Soft,

I cannot save any questions, the SAVE button isn't working. I tried changing editors like I used to do when this problem happens, now it isn't working.

I have the same question as http://www.ari-soft.com/ARI-Quiz-Lite/58716-can-t-save-any-question.html?_

I have read the solution already that I have to somehow download and update the component to make it work.

Unfortunately, my joomla cannot find any updates for the components. and should I download manually? And if yes how may I download it, from where, and how may I update it?

Thanks in advance,

Regards,

JVKTh

Hello,

Download the latest version of the extension here, open "Extensions -> Manage -> Install" page on Joomla! backend and install the component.

Regards,
ARI Soft
