
Quiz list layout as module

Posted by acausade - 2016/11/08 10:29

Hi

Is it possible to create a module that lists the quizzes like the quiz list layout menu option?

Maybe create a custom module? Could I use the code from quiz_list.html.php?

I would like the available quizzes to show in my sidebar

Thanks in advance

Hello,

It requires to develop a new module.

Regards,
ARI Soft
