
Ari Quiz Lite \$userScore is always zero

Posted by Toktassynov - 2016/11/29 11:55

Hello, Admin

I have a problem. Every time when I run the Ari Quiz Lite arbitrary test and do the right answers I end up getting 0 for \$userScore although I am sure I scored more.

The attachment below has a screenshot of output message I get after quiz.

Something is wrong with the quiz, may be and questions are not saved when I click "save".

Please Help. :)

Version: the latest ARI Quiz Lite, 1.2.7, Joomla 2.5

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
