
Certificate registration number

Posted by Toktassynov - 2016/12/10 09:03

Hello!

As I know, you can't attach results in PDF in email using Ari Quiz Lite so thinking of buying Ari Quiz version.

Can you tell me if it is compatible with my current Joomla! 2.5.28 Stable? And how do I migrate from Ari Quiz Lite to Ari Quiz.

One more question: in my Ari Quiz I need to be able to insert a certificate registration number (maybe something like TicketId. How do I do it? According to documentation there is no such predefined parameter.

Thank you in advance.

Hello,

"ARI Quiz" is compatible with Joomla! 2.5.x. "ARI Quiz Lite" can be upgraded to "ARI Quiz" and all quizzes will be available after upgrade.

We can add ability to use ticketId in text templates for free.

Regards,
ARI Soft

Hello! I have purchased Ari Quiz. Installed it on my site on top of the existing Ari Quiz Lite.

The problem is the questions didn't move to Ari Quiz, only output templates, categories, quizzes.

But the main problem is that when I try to change, add, or edit anything on backend - it won't allow me to do it. I get a star sign (#) at the end of each link. Looks like I haven't done the upgrade very well.

Please help. I have send you access to my Joomla backend.

Hello,

We can open questions on your backend without problem. Try to clean browser's cache.

Regards,
ARI Soft
