How to get value input
Posted by Shamil - 2017/10/22 10:42

_____

I created input with name "usertest" in file quiz.html.php

How to get this value input in file question.html.php
$usertest = $_POST; is not working. if that is not working, I don't know what is. Help me!

File: Quiz.html.php

_____

Hello,

Do you use the following code in frontend_pages/get_ticket.php file?

$usertest = $_POST;

Regards,
ARI Soft

_____

Data are sent to get_ticket.php file from the form on quiz.html.php file.

Regards,
ARI Soft

Ok. I added this code to the file get_ticket.php
$usertest = JRequest::getVar('usertest');
How can I get the value of the variable $usertest in question.html.php?

_____

The extensions redirects to question.php file in get_ticket.php. You can add the variable to redirect URL or save it in session.
