
ari cloud carousel pro

Posted by dnederveld - 2019/07/23 20:36

I want to create a german language file for the backend.

Found the en-GB file in the core language directory.

I can translate it to German with Filename de-DE.mod_aricloudcarousel.ini and store it in the de-DE path.

How can I make the german language file active?

Sorry, I have found the solution in the description.
