
No result page is showing up

Posted by steph38 - 2020/01/20 16:53

Hi everyone, I have a few problems : When I am setting up a new CSS file and apply it nothing happens (had to modify the file /component/com_ari.../css/Default.css). Has anyone an idea why this is not working ? Tested a new quiz and have no result page showing up the code on the empty result page is in the attached txt file

Has any one an idea what's happening ? Thanks in advance for your help and advises. Please let my know if you need more information. And please forgive me my English as it is not my mother language, I'm French. WBR, StÃ©phane

Hello,

Have you created text template(s) and assigned them in quiz settings ("Successful Template" and "Failed Template" parameters)? If a text template is not assigned, an empty page will be shown at the end of quiz.

Regards,
ARI Soft

Hello,

You are right, missed this part.

Have another problem now :
When editing an existing answer of a question, I cannot save it... none of the buttons working
code of the buttons in attached txt file.

By the way I cannot enter any HTML between the

If needed I can provide an admin acces to the joomla install (production install) but on a real private message only.

Thanks in advance for your help and advises,
WBR,

Hello,

Found the origin of my problems : an FF extension (do not know which one is the responsible)
Have used Cliqz browser and all is working perfectly.

Remaining question :

Is it possible with the lite version to display the full result page (i.e. with the right and wrong answers) ?

Thanks in advance for your help and advises

WBR,
StÃ©phane

Hello

Lite version doesn't support ability to show questions with correct/incorrect answers at the end of quiz. This feature is only supported by "ARI Quiz".
