
Possible to have a default selection?

Posted by hominid4 - 2010/10/14 19:50

I've set up Quiz Lite for a client and each question has a set of radio button answers, the client is wanting the correct answer radio button for each question pre-selected. Is it possible to set a default radio button?

Thanks!,
Wesley

Hello,

This feature requires custom modification of the component.

Regards,
ARI Soft
