\"hanging thumbnail\" at the end of rotation
Posted by oldmoldy - 2011/02/10 23:31
_____

I have just installed the slider and put up a sample of 5 images. After the 5th image, the module shows a thumbnail for several seconds in the top left corner of the first image before re-starting the image rotation. Is there a way to get rid of this?

_____

I noticed that the problem went away when I set the Start slide index to -1 (the documentation says this is a 0 based index)

_____

Hello,

'0' is normal value for 'Start slide'. Version 1.4.1 contains fix for described issue, download and upgrade the module please.

Regards,
ARI Soft

_____

I retrieved my extension yesterday and, according to the Joomla Extension Manager am using the most current version of this extension and still have the problem. I am working on a new site using Joomla core v1.5.22.

The work-around I have described satisfies my customer's needs but I don't know why it works and is not elegant since it contradicts the documentation.

_____

When you wrote the first post, only "ARI Image Slider" v. 1.4.0 was available. We released v. 1.4.1 after your post and it contains fix for described bug. If upgrade doesn't help, clean browser cache please.

Regards,
ARI Soft

_____

The problem is solved. Thank you.

There are a couple of remaining details that I would be interested in changing. I know that you don't advertise this extension as having the capability to display thumb-nail images below the slide show box; however, it would really help

my customer if we could do that. I'd be happy to contribute to the development of this enhancement if I could. While not experienced in Joomla development, I have been a programmer for 4 decades and have learned some .php along with the HTML box model.

I would also like the capability to have my thumbnail images displayed in odd shapes and sizes. I would like an option for the dimensions specified for the thumbnails used as limits with the overflow clipped off. This would make for a very flexible art gallery display.

Can we work on this?
