
[DONE]Other effects such as fade in/out possible?

Posted by mistan - 2011/03/08 01:38

Is it possible to have some effects such as fade in/out? change the z-index? Maybe I am just thinking out loud. My client did not like the sliding effect. Thanks.

Tony

or at least help some mild and less dizzy sliding effects like this ,<http://www.yootheme.com/tools/extensions/yoocarousel>
Thanks again for everything. Please help. Tony

Hello,

We will add fade effect within 2 days.

Download and upgrade "ARI Slider" module. New version provides ability to choose "Fade" effect for "Move effect" parameter.

Wow, your guys are amazing. I will write a good review today, You deserve it.

A couple of minor changes will make this perfect:

1. Can you make slides showing up in "fade in"? my client site link <http://www.jenniferfieldbankruptcy.com/>
2. Is there a way to add a pause so that I can define how long each slide will stay? Typically, for a slideshow, I'd like to have 1 sec transition effects (fade out pre slide and fade in post one) and slide should stay for 3-5 secs or so.

I know I may be asking too much, but so far, you guys never cease surprise me.

Thank you!!

Tony

1. Do you mean that previous slide should use fade out effect and new slide fade in? Probably you can provide link to page where we can see the similar effect?
2. If you mean auto rotation, "Auto Rotate" parameter is used that define delay in milliseconds between slides rotating.

Thanks again for your quick assistance.

1. yeah, it will be nice to have a parameter to set the transition time to fade out (alpha from 100 to 0) the pre slide and fade in (alpha from 0 to 100) the post slide. The fade in and fade out should happen same time. I do not have a example site on top of head.

2. yeah, that is what I mean, auto-rotate, I mistakenly thought it is 1 or 0.

Please help code the item 1, Thanks.

Update, I am still in need of this feature. I will need to set the time (half to one sec) for pre slide to fade out and post slide to fade in. This should happen simultaneously. I do not know how much coding for you, but to me, you are a magician, anything is possible. Thanks so much for all the help. Tony

Hello,

"ARI Slider" v. 1.7.4 supports "Fade in-out" transition effect.
