
jump to slide from within slide

Posted by philu - 2011/03/08 19:14

Is it possible? I tried to get this working by myself, but i think i need a hint. <http://www.ari-soft.com/images/fbfiles/images/jumptotab.jpg>

Also, to expand upon the initial question, I was curious if there was a way to make a menu that allows you to jump to a particular slide?

Hello,

Download and upgrade "ARI Slider" module please. The latest version can handle the following links to slider menu items:

Go to Item #2

Specify zero-based index of menu item which you want to show if a user click by the link in "rel" attribute.

If you need more assistance or have questions, feel free to ask them and we will be glad to help.

Regards,
ARI Soft
