lightbox won\'t load in articles?

Posted by mistan - 2011/03/11 08:13

_____

Lightbox won't load in articles?   Took me 30min, still won't work. Show up in module position OK, Link here

Help please,

Tony

_____

Hello,

Provide more details what doesn't work? Do you use "System - ARI Sexy Lightbox Anywhere" plugin that load "ARI Sexy Lightbox" module?

Regards,
ARI Soft

_____

yean, I did install and enable all the plugins.   What I did then was created a copy of Lightbox module with a custom position and load it in articles with {loadposition the-position-I-defined}?   Please confirm and help.

Thank you.

Tony

_____

You can use "System - ARI Sexy Lightbox Anywhere" plugin that load "ARI Sexy Lightbox" module in articles. Code looks like:

{arisexylightbox moduleId="MODULE_ID"}{/arisexylightbox}

Where MODULE_ID is ID of the module which you want to insert into an article. If you want to insert module with ID equals to 75, use the next code:

{arisexylightbox moduleId="75"}{/arisexylightbox}

Note: check that "System - ARI Sexy Lightbox Anywhere" plugin is installed, enabled and configured and module which you want to load is enabled too.

Regards,
ARI Soft
