## Rotate thumbnails

Posted by littlepi - 2011/03/21 18:24

---

I have thumbnails that appear off the navigation menu, one is partially visible now, I would be fine to adjust the thumbnail size to fit only visible but would want thumbnails currently not seen to rotate with articles they are assigned to. Also, is there a way to keep an article and thumbnail always in the first position at launch, or start of slider before it begins to rotate.

Thanks for the sizing issues, great support. Again, here is the url for slider:

Could you provide screenshot with explanation what you want to see?

I have emailed administrative back end info. Thanks.  
Need thumbnails currently off-screen to rotate into view with relevant articles [http://www.ari-soft.com/images/fbfiles/images/Picture\\_1.jpg](http://www.ari-soft.com/images/fbfiles/images/Picture_1.jpg)

Set "Show navigation buttons" parameter to "Auto" or "Yes":

OMG! I have never experienced such great support before... EVER! I have never needed to rate a module developer before so I do not know where to go, but I will figure it out, I must rate and comment you all at maximum satisfaction! Not withstanding the fact that I should have figured this one out on my own, oops. Anyway, thanks for the code snippets and all the help! James/littlepi
