
Only show intro text of the original article

Posted by communicat - 2011/05/07 13:43

Hi,

Does anybody know how I can show only the intro text, before the 'read more' of the original article? I would like to be visible in Ari Slider:

- title article (in h5 for instance)
- intro text before 'read more' (plain text)
- the 'read more' sign to be a link to the actual article

Is this possible?

I use Joomla!1.6.3 and the latest module Ari Slider (7-5-2011).

Hello,

About title read here please. About other 2 questions, set "Item Template" parameter to:

{\$introtext}

Thank you for your quick response!

However, the code {\$title} (or any h) has no effect on the title, it appears in plain text.

Also the 'read more' code as above still doesn't link to the actual article. Is this perhaps a bug?

And the articles keep appearing beneath each other instead of 1 article per view. I think this happens after clicking the 'read more'.

Last but not least; all text keeps showing instead of only the intro.

Any help is greatly appreciated!
