descriptions & links?

Posted by operapixie - 2011/05/10 03:02
_____

I'm not having any luck getting my descriptions to show up. Is there a sample, working .ini file I can work from?

Here's my site: http://www.thecht.orghttp://www.thecht.org

Hello,

Find sample INI file in attach. INI file should be located in folder with images.

 http://www.ari-soft.com/images/fbfiles/files/ariimageslider-f2737e9f24238fe6140130cef3223a01.zip

Thanks awfully much. I've used that as a model, and uploaded it to the same directory where the slider images are located, but I'm not getting anything showing up on my slider. Would you be willing to take a look and see if you can tell what might be wrong? My website is: http://www.thecht.org.

Thanks in advance.

~Laura

We can investigate the problem if you provide temporary access to your Joomla! backend by email.

_____

You use modified version of the module. We suppose it modified by your site template developers. They disabled ability

to show image captions by the next CSS rule in /templates/theme694/css/template.css file:

.nivo-caption {
    ...
    display: none !important;
    ...
}

If you comment this line, caption will be shown, but it will be shown in incorrect position. We can recommend to contact site template developers that they add ability to use captions.

Regards,
ARI Soft
