Dear ARI Tech Support,

My sliding content shows fine in FF, Chrome, IE9, but NOT in IE 7 and 8. As shown in attached image, the content at left is not showing in IE 7 and 8. Please confirm and help. Thanks as usual for all your wonderful support. Hello,

Sorry, but provided link doesn't contain slider extension. Could you provide correct link?

It is working fine now. Is there any reason why it will still break in compatible mode in IE 8 and 9?

Thank you so much for everything.
