
tabsmon news slider - firefox 3.6 and 4 in Mac OSX

Posted by mediamixeruk - 2011/05/29 10:24

Hi I purchased the smart content suite yesterday

hope you can help with this. In News Slider, the tabs display is fine in IE7,8 and Safari,

but what should I adjust to make them work on Firefox on Mac?

please see attached

or here <http://www.betterbankside.co.uk/walking>

thank you very much http://www.ari-soft.com/images/fbfiles/images/Screen_shot_2011_05_29_at_11.png

Hello,

You can try to increase value of "width" attribute of {arijnewsslider} tag.

I just increase it from 450px to 500px, but it isnt adjusting itself

are there values in the js file or php plugin file that calculate the width of the tabs based on the total width - can we adjust these?

see attached at 500px http://www.ari-soft.com/images/fbfiles/images/Screen_shot_2011_05_30_at_11.png

Create CSS template in "CSS Templates" section on component backend with the next code:

```
.ariNewsSlider .navContainer
{
width: 100% !important;
text-align: center;
}
```

```
.ariNewsSlider .navContainer UL
{
float: none !important;
display: inline-block;
zoom: 1;
*display: inline;
}
```

PS: Don't forget to enable CSS template.

Regards,
ARI Soft
