Issue in Internet Explorer 8

Posted by qpidity - 2011/09/01 21:21

_____

Hi,

The slider works well in all browsers except internet explorer. There is no slider movement at all. Can you please help ?
You can see it in action   here

Thanks in advance

PS - strange, after some time the slider movement started to work again but I am still concerned that IE users may have
issues

_____

Hello,

Does it work now? When we open provided page in IE 8, the slider works fine.

Regards,
ARI Soft
