
ariimageslider not starting

Posted by vinceairsnow - 2011/09/13 17:52

Hi guys, we bought a template with your slider in it

It does not start sliding, i've been all around it and no way to find a solution

our website is <http://nakasia-massage.com/>

could you help me ?

Hello,

Extension javascript files can't be loaded because 403 HTTP error occurs. Check module folder and sub-folders permissions. If it doesn't help, contact your hosting support that they check .htaccess and web server configuration.

PS: For example this file can be loaded.

Regards,
ARI Soft
