Error JFolder: :files: Path is not a folder Path

Posted by safe77 - 2012/01/20 13:59

_____

Hi,
I have Ari Image slider on joomla 1.7
On live server the slideshow works but below it shows me the following error :
 Error JFolder: :files: Path is not a folder Path: web/htdocs/ww....

I tested the same site on localhost and works fine.
I have other images on the site and doesn't give that error, could be permission issue ?
the site is ww w.sorrentoboats.it

Any suggestions are welcome
thx B)

_____

Hello,

It seems this problem with value of "Image path" parameter. Remove all unnecessary new line(s). If it doesn't help, provide screenshot(s) of module settings page by email.

Regards,
ARI Soft
