
Width in percentage %

Posted by GGCath - 2012/01/20 14:56

Hi!

I need to have my header take 100% of the page width...

How can I do this with ARI Slider for J1.6? Is there some line I can change?

Thanks,

Catherine

Hello,

Do you mean "ARI Slider" or "ARI Image Slider"? If you mean "ARI Slider", it supports ability to fit the slider to a container width.

Regards,
ARI Soft

Oops, I meant ARI Image slider, I didn't look properly at the category.

Is it possible with the Image Slider?

Thank you,

"ARI Image Slider" accepts fixed width. It is not possible to set it in percent.
