

how to display intro text in Menu

Posted by shehzi - 2012/04/04 14:38

how to display intro text in Menu, is there any variable i can use to display intro text or full text i have been trying using

how to display intro text in Menu //echo \$dataitem; in tmp/menu.php file but no success???

Please help

Hello,

\$dataitem contains text of slider item

\$dataitem contains title of slider item

Data is filled in \modules\mod_arislider\includes\kernel\Slider\Models\class.SliderArticlesModel.php
(\modules\mod_arislider\includes\kernel\Slider\Models\class.SliderArticleModel.php).

Regards,
ARI Soft

Thanks for your reply.

I just want to read Article image and display it in menu can i read from \$dataitem ???

Thanks in advance...

\$dataitem contains content which is defined in "Item Template" parameter in module settings. If you want to get article field(s), see \$article variable in foreach cycle in

\modules\mod_arislider\includes\kernel\Slider\Models\class.SliderArticlesModel.php
(\modules\mod_arislider\includes\kernel\Slider\Models\class.SliderArticleModel.php) file.
