
Incorrect format when loadmodule in article

Posted by roelschoen - 2012/12/28 22:18

All,

When I include the ARI image slider to a position the formatting is perfect. But when i use {loadposition slider} slider it shows a black border on the left side, and the image "jumps" when changing.

Does anybody have an idea how I can change this?

Thanks for the help

Hello,

Where we can see the problem?

Regards,
ARI Soft

This problem with site template styles. Add the following CSS rule to fix the problem:

```
DIV.ari-image-slider IMG
{
  margin: 0;
}
```
