
Images move up before next slide apears

Posted by mpark - 2013/03/12 18:31

Hey,

I am wondering how I can make it so the images in the slider show up center and don't move up right before the next images shows up.

The first image is centered and then when the second image comes in it is lower and then centers before the the next image shows up.

Let me know what I have done wrong here.

Thanks and a great product.

Hello,

Where we can see the problem?

Regards,
ARI Soft
