Borders

Posted by wecreatem - 2014/03/15 16:26

_____

I have three sets of slides at www.basslakedouble.com (previous password still works) and there appears to be a border on several of the slides. The photos have been setup to be the same size. Is it possible to eliminate the borders?

_____

Hello,

Send an image where we can see the borders.

Regards,
ARI Soft

_____

I have attached a word document with the screen shot of the site. You will see the border that appears on the first and second image
