Distorted images/Scaling Problem

Posted by Schluppi - 2014/04/24 08:32

_____

Hi everybody,

on my site: suewag.webzimmern.de I use ari slider and I'm very happy with the module.
Only one thing: When an image slides, it scles to another size. Specially the Logo with Text looks not good while the transition. It doesnt matter, which slide-effekt I choose. The image slides down and scales...

Is there any posibility to slide the image from left to right with no scaling effect while sliding.

Thank you so much for your help!

Best
Julia

_____

Hello,

This effect appears because your images have different dimensions.

Regards,
ARI Soft
