
Asido driver ?

Posted by marcmarc - 2014/06/17 14:47

Hi,
I have a issue on a Joomla site since I've changed my server.

On a page where there is a Ari Slider module, the page is blank.
error is :

Fatal error: Asido driver file

"/home/***/public_html/modules/mod_ariimageslider/mod_ariimageslider/kernel/Image/Asido/class.driver.imagick2_ext.php" (for driver "imagick2_ext") not found for including in
/home/***/public_html/modules/mod_ariimageslider/mod_ariimageslider/kernel/Image/Asido/class.asido.php on line 332

btw, I have the same issue with the carousel module

Fatal error: Asido driver file

"/home/***/public_html/modules/mod_aricloudcarousel/mod_aricloudcarousel/kernel/Image/Asido/class.driver.imagick2_ext.php" (for driver "imagick2_ext") not found for including in
/home/***/public_html/modules/mod_aricloudcarousel/mod_aricloudcarousel/kernel/Image/Asido/class.asido.php on line 332

Joomla 3.3.1, latest versions of slider and carousel.
server runs php 5.4.29

any ideas ?
thanks

Hello,

Download and upgrade the extensions or ask your hosting support to install GD PHP extension.

Regards,
ARI Soft

the extensions are updated to the last version and it doesn't work.
what is working is, as you said, installing php-gd lib.
thanks
