
ARI SLIDER youtube video

Posted by leibhold - 2015/09/28 03:27

B)

Hello,

this may just be a RTFM but I am having trouble with putting in a YouTube video into a slider

I select new slider, element YouTube video and put in the html. The element shows in window

I can click play and it runs. But if I click play slide, it shows 100% load but then a white screen.

I have other sliders with html5 video which works.

IS there something I have messed up or missing?

I did this as a new slide and didn't change any options apart from add element and change background to red

I am using latest version and joomla 3

Hello,

Could you send a link to a page where the problem occurs?

Regards,

ARI Soft

<http://medpracit.com.au/test.html>

is a menu item with just the slider

<http://medpracit.com.au/vdeos.html>

is page with other items
