
[BUG REPORT] with Joomla 3.5

Posted by clioschiano - 2016/03/22 11:14

Reference with this post on the official Joomla forum
<http://forum.joomla.org/viewtopic.php?f=710&t=913707>

Your ARI Slider Menu doesn't work with Joomla 3.5

I had to disable it in order to update from 3.4.8 to 3.5.

Have a nice day

Clio

Hello,

It seems you use an old version of the extension. v. 2.2.0 is working fine with Joomla! 3.5. The latest version of the module is available here.

PS: Update the post on Joomla! forum please.

Regards,
ARI Soft

I saw the version on the JED
<http://extensions.joomla.org/extension/ari-image-slider>

and it was the same version I got...

OK. I've downloaded it, but would be better to update the JED and maybe highlight the version number of the module on your website (maybe as the file name too).

Thank you

I've downloaded not the last version, it works fine.

have a nice day

Sorry for inconvenience. We updated information on JED site. BTW, "ARI Image Slider" v. 2.2.0 was released 22 November 2015. You can follow us on Twitter to know about extensions' updates.

Regards,
ARI Soft
