
Images not rotating on mobile

Posted by cottonpk - 2016/04/19 09:08

Greetings,

I am happy with how ARI Slider works on my Joomla! Site. On the desktop rendition, everything is perfect.

However, only the first image is displayed on the mobile rendition. The images do not rotate, like they should.

<http://www.kundanrefractories.net/kr/>

Perhaps I am doing something wrong? Can you please help?

Thanks.

EDIT: I am sorry this post might be in the wrong area. I am using ARI Image Slider.

Hello,

In what browser the problem occurs? We checked it in Google Chrome on Android device and the slider works fine on your site.

Regards,
ARI Soft
