
ARI Image Slider stays black doesn't load images

Posted by ithelps - 2016/05/18 14:27

Hi,

after Joomla update 3.5.1 ARI Image slider doesn't load any images, it stays only black. I use the latest version of the slider. I tried with ARI Sexylightbox module and Plugin still no change. Here is a link to the site:

<http://cash-box.tierschutz.or.at/index.php>

Hello,

This problem with mod_testimonial module. It loads own copy of jQuery library instead of using jQuery instance which is loaded by Joomla! Disable jQuery in module settings (if it is supported this option) or can use "Easy jQuery" plugin to resolve this problem.

Regards,
ARI Soft
