Numbers instead of bullets in navigation bar
Posted by kgnikola - 2016/05/22 08:14

_____

Hi, You are great. For me this is THE BEST image slider.

I am trying to customize it for my website, and I am interested is there possibility to display numbers in navigation bar instead of bullets?

Thank you in advance

Nikola

Hello,

Thank you for a good word about the extension. It doesn't support ability to show numbers instead of bullets, but you can modify it for your needs. See /modules/mod_ariimageslider/tmpl/default.php template file.

Regards,
ARI Soft

_____

Ups, that's to much of unknown coding for me :)

Anyway, thank you very much :)

_____

We can implement this feature for ARI Smart Content - Nivo Slider add-on.

Regards,
ARI Soft
