
Slider only showing one image then collapsing

Posted by davindersangha - 2016/08/10 16:34

Just removed some images from the directory, cleared cache and even renamed the directory, but Ari seems to show one image and then it collapses.

Hello,

What browser do you use? We checked it in Firefox and the slider works fine.

Regards,
ARI Soft

Thanks. Seems okay now. Did quite a lot of cache cleaning yesterday, but it didn't seem to work then.
