
Image but no Slider

Posted by pelyon - 2016/11/30 23:49

Hi,

I installed and configured the module for joomla 1.5, and get an image, but the slider is not working, just a static image. Navigation is not visible either. Any ideas for troubleshooting?

Thanks very much,

-Pelyon

Hello,

The problem occurs because several versions of jQuery library are loaded on the page and an old version of jQuery is used by site template.

Regards,
ARI Soft

Hi, thanks for the reply. Can you recommend a fix for this problem? Can I change the jquery version the site template uses, or must I update the template to do this? I'm pretty sure there is no update available. Thanks for any ideas you can share.

HI, I fixed the problem. I enabled an existing plugin called "system-mootools upgrade" and the module works perfectly .Thanks very much,

-Pelyon
