
joomla core lightbox

Posted by iacopo.iadarola - 2017/08/05 07:36

Hi I used your ari image slider. I would like to integrate the lightbox in the slider (joomla core lightbox) but on mobile device the lightbox spans all over the screen, distorting the image..how can I have a nice RESPONSIVE lightbox popup? you can see here
[www.madonnadellaneveadro.it/home/index.p...tuario/gli-affreschi](http://www.madonnadellaneveadro.it/home/index.php/...tuario/gli-affreschi)
thanx

Hello,

It is not possible to open the link. Check it please.

Regards,
ARI Soft

This problem not with "ARI Image Slider" extension, this problem with the lightbox. You can integrate the slide with another lightbox extension, for example with "ARI Fancybox".
